Abstract

Shows a commercial or institutional building, such as hotel, school, office complex, sport arena or convention centre

Purpose

To show a commercial or institutional building, such as hotel, school, office complex, sport arena or convention centre imagery and mapping datasets to support operations, planning and training. Provide accurate high-resolution imagery and mapping datasets to support operations, planning and training.

Lineage**LI _ Lineage****Statement**

MGCP is a coalition of over 30 countries dedicated to producing high-resolution vector data throughout high interest areas of the world. Data is extracted from high resolution imagery in 1° x 1° cells at a scale of 1:50 000. All data produced must meet a minimum horizontal circular error accuracy of 25m and meet MGCP Technical Reference Documentation (TRD) specifications which details extraction guidelines and feature catalogues to ensure consistency. Cell and subregion metadata delivered in XML files based on ISO standards 19115 for geographic content and 19139 for XML implementation will accompany the data. MGCP feature geometry positioned from Orthorectified Very High Resolution Commercial Stereoscopic and Monoscopic Imagery, AAFIF, DAFIF, DVOF, GPS, Topographic Maps and Geonames.
